

Edgeware Selected by KPN to Expand VOD Services and Deliver Unmatched QoE

KPN implements Edgeware's video servers as part of a solution developed by Nokia Siemens Networks to provide advanced VOD services

Stockholm – February 1, 2011 - Edgeware, the technology leader in distributed video delivery, today announced that it has been chosen by KPN, a leading European telecommunications and ICT provider, to deploy its distributed video delivery architecture and products as a part of a solution provided by Nokia Siemens Network (NSN).

Nokia Siemens Networks (NSN) has selected and implemented Edgeware as a key element of its overall advanced on-demand TV and video offering and specifically its market leading Ubiquity Multiscreen TV™ solution at a global level. Using this solution, NSN will replace KPN's existing platforms with Edgeware's Orbit-2X and WebTV servers.

Edgeware's Orbit video server platform features built-in capability to record live TV channels, enabling KPN's IPTV infrastructure to deliver its subscribers advanced on-demand services, as well as support for advanced linear TV functions.

KPN is the leading telecommunications and ICT service provider in The Netherlands, offering wireline and wireless telephony, Internet and TV to consumers, and end-to-end telecommunications and ICT services to business customers.

"KPN has clearly taken the lead in providing innovative and exciting services to the Netherlands," said Joachim Roos, chief executive officer of Edgeware. "Edgeware's success with KPN is a direct result of the cooperation with one of our strategic global OEM partners to enable advanced on-demand TV services."

About Edgeware

Edgeware is the technology leader in distributed delivery systems needed for a new era of "anytime, anywhere" TV and video. Edgeware's next-generation purpose-built appliances and integrated systems enable operators and carriers to cost-effectively grow their TV and video services and scale them across their network to an increasing number of users on any device. Edgeware is headquartered in Stockholm, Sweden, with a U.S. office in San Jose, California.
