DEPLOY YOUR EDGEWARE TV CDN AS A TURN-KEY PROJECT FOR OPTIMIZED IMPLEMENTATION

The Deployment service enables you to deploy your Edgware TV CDN solution as a turn-key project. By letting Edgware experts design the network architecture and perform implementation your deployment project are in the hands of those knowing the products in detail which can reduce the roll-out time and shorten time to revenue for your solution.

WHAT IT DOES

The Deployment service takes your TV CDN deployment project through different steps in order for you to go live with the solution as smooth and quickly as possible.

The steps include detailed (low level) network design, software implementation, functional acceptance testing, system integration support & system acceptance support in addition to project management throughout the whole Edgware solution project.

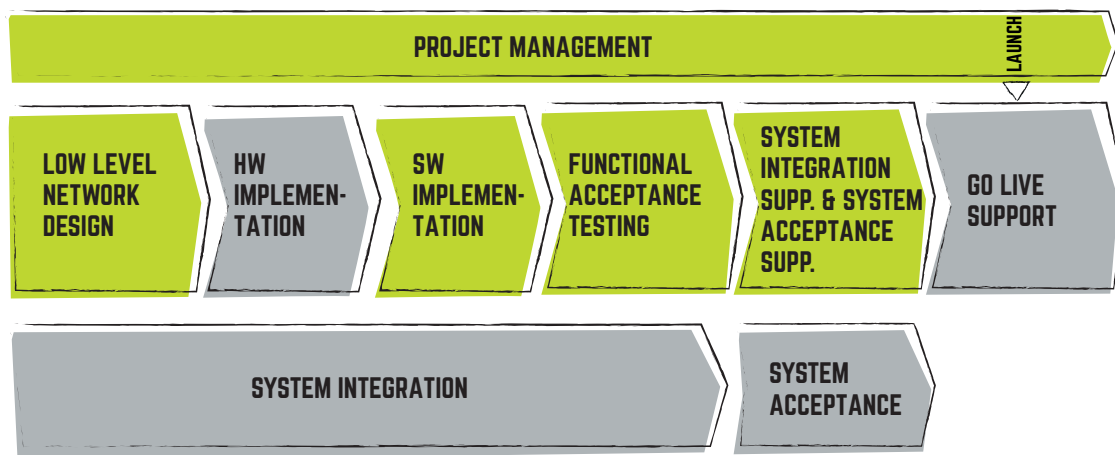

Optional steps of the Deployment service include hardware implementation, full system integration, system acceptance and go live support.

KEY BENEFITS

- ✓ Turn-key project letting you concentrate on your key business while we deploy your TV CDN solution
- ✓ Edgware experts with detailed product knowledge perform all stages in the project, ensuring the most optimized network architecture and implementation
- ✓ Extensive product knowledge ensuring the project is delivered as quickly as possible and avoiding delays
- ✓ Project is run in a professional step-by-step manner assuring easy overview of status and progress
- ✓ Well documented and tested solution

HOW IT WORKS

1. Edgware experts perform detailed network design based on customer's requirements.
2. Typically the customer performs HW installation and Edgware performs the SW installation and configuration.
3. Edgware solution including HW and SW is tested and accepted during the functional acceptance.
4. During system acceptance Edgware will provide support with testing and trouble shooting.
5. If requested, Edgware can also perform system integration and acceptance of the entire eco system as well as support during launch phase.

The steps of the Deployment service presented in a flow-chart illustration. This is described in the How it works section on the previous page.
